GTSE24 is the fourth edition of the conference series Green Technologies for Sustainable Environment and also its first European edition. The conference topics include environmental protection, development of green technologies, sustainable development, and circular economy.

GTSE 2024 aims to promote research in the field of green technologies and sustainable environment and facilitates the exchange of new ideas in these fields among academicians, engineers, scientists, and practitioners. The GTSE24 will be held on-site from September 22nd to September 26th, 2024 at the Poznan University of Technology Campus.

Scope of the conference:

- Advanced waste/wastewater treatment and reuse
- · Air pollution control and monitoring
- Redefining of environmental pollutants
- · Disruptive environmental technologies
- Solid waste and water resource management
- Applied technology/nanotechnology for environmental applications
- · Advanced analytical techniques for environmental monitoring
- Energy and resource recovery from waste and wastewater
- New micropollutants in the environment current achievements, challenges. and predictions

The high scientific level of the organized event was appreciated by the Ministry of Education and Science, getting funding from the state budget, granted by the Minister of Education and Science under the "Excellent Science II" Program.

Acknowledgments

This project was supported by the Polish Ministry of Science and Higher Education, as a part of the "Excellent Science II" Program (Poland)
